Sigineer Power’s 120/240V Split phase inverter is an international model which can be used in 120/240V systems in America and also 230Vac single phase systems.
Users from 230Vac 50Hz single phase electricity system (230Vac L+N+G) must strictly follow our wiring instructions, or damage to inverter will occur.
1. Connect Ground wire to Ground terminal.
2. Connect Input Hot to AC Input Hot1.
3. Connect Input Neutral to AC Input Hot2.
4. Connect Output Hot to AC Input Hot1.
5. Connect output Neutral to AC Input Hot2.
6. Leave the right pin unconnected, don’t connect Input Neutral to it.
Don't connect any cable to this pin.
